

Elect Anna Votin

For Year 1 Humanities &
Social Sciences Rep

About Me:

My name is Anna, and I am a first year Computing student taking the 'Drawing and Illustrations' Horizons course. Like many of you, I love all things science, however I was ecstatic to find out that Imperial offered the opportunity to be able to explore a topic of my choice, taught by a professional.

My Goals

I will be open to listening to any of your problems, suggestions and other comments that come up relating to your Horizons modules so that you can make the most of the opportunity, and ensure that it is a rewarding experience for everyone. I will advocate for an assortment of modules that reflect the interests of the Imperial community and teaching that is interactive and engaging so your Horizons course can serve as a break from regular lectures.
