

CAMILA GONCALVES LEON

First-Year Biochemistry Student

A LITTLE ABOUT ME

I am from Venezuela but have lived most of my life abroad. Prior to coming to Imperial, I lived in Bolivia for 3 years.

I would be able to easily **adapt** to my new role as President

I am an **easy to talk to**; open to committee/society members approaching me to share any concerns and/or innovative ideas!

**FEEL FREE TO
REACH OUT!**

VOTE FOR ME AS YOUR PRESIDENT OF BIOCHEMSOC

➤ MY GOALS

Assistance:

- Work with Imperial's staff to provide students more **biochemistry-oriented information** on where our degree can take us.
- Help take off some **stress off our shoulders** about the future.
- Organize short, routinely **workshops** where first-year students can come ask any questions to upperclassmen.

Collaboration:

- I would work hard to encourage biochemists of **all year groups to engage** with each other and help each other.
- Take advantage of our **university's academics** so that they could get involved in our society's events.
- I plan on organizing talks that the members find **interesting** and hopefully learn **without pressure**.

Empowerment:

- As a first-year student, I benefitted from having biochem-parents. I want to continue this **mentorship program** to help incoming students settle into university.
