

VOTE

FOR POSTGRADUATE ENGINEERING COUNCIL REP!

DENIZ ETIT

My Vision

Improving wellbeing for ALL OF US! My main goal is to build a platform across London universities **to update the UKRI-set London allowance in PG salaries from £2,000 (set in 1992) to £6,000 (should be today) per year.** I will also listen and address any other needs!

For my full manifesto, see [here](#):

For our London allowance proposal, see [here](#):

I DELIVER! Here is my record last year as departmental rep:

Promises made...

Chem Eng doctoral salaries increased 3.1% in 2023, whereas inflation was 6.7%.

Chem Eng GTA rates were lower than other departments.

Lack of proper research supervision in certain cases.

Making academic events targeted for our needs.

More social events to connect our community.

Promises kept!

→ Chem Eng doctoral salaries increased 5% in 2024.

→ Chem Eng GTA rates increased 23% in 2024, making it equal with other departments.

→ Graduate School agreed to review supervisors training frequency from 6 years to 3 years.

→ Interest gathered via surveys & organised career events.

→ Organised >10 social events (parties, daytrip, bouldering, picnic...) and built focus groups.
