

Mr. Swapnil Kumar

Academic and Welfare Officer (AWO PGT), Faculty of Engineering

Imperial College London

Email: swapnil.kumar22@imperial.ac.uk

Website: <https://www.imperial.ac.uk/people/swapnil.kumar22>

Scholar – Imperial College London, ETH Zurich, Boeing & Royal Aeronautical Society

Visiting Researcher – Harvard Medical School, Harvard University, United States

Visiting Researcher – NASA Langley Research Center, United States

Research Fellow – Department of Mechanical & Process Engineering, ETH Zurich, Switzerland

Project Engineer – University of Louisville, United States

Nomination:

Deputy President (Education)

Proposals:

- Providing feedback and transparency in the exam & marks allocation process: I will make sure students know how their marks have been allocated for the assignment and exams. Along with that I will also make sure, if the exam paper is not in accordance to the deliverables delivered in the class then immediate action should be taken in that aspect.*
- I will also work with students to reduce the workload wherever possible.*
- Implementing Standard Operating procedures (SOP) to reduce the barrier in accessing the wellbeing support. This will include all the case scenarios, for example, if wellbeing advisor is on leave or there is delay in the communication part, then in that case, SOP will guide you to find the next immediate point of contact along with the immediate health consultation from the doctor on the very same day.*
- Maintaining proper engagement and feedback sessions with Academic Representatives on regular basis*
