EXPERIENCE

Sponsorship Officer of IC FemTech Society: Helped in the organisation and planning of events and outreach to sponsors

Speaker Coordinator for IC TEDx Society: Outreach to speakers to give talks on campus

Subcommittee for the inaugural IC Medathon (Medical Hackathon): Worked with team in the running of a 2-day hackathon on campus

I am passionate about organizing high-standard speaker and workshop events, from a variety of different people in the vast industry, that promote the field of MedTech and its importance, value and fascinating potential.

SOME AIMS, GOALS & IDEAS

- Organise more talks/workshops by **female leaders** in the MedTech field to encourage woman interested in the field
- Organize **interactive workshops** for students to gain basic coding skills, and business/entrepreneurial skills
- Allow for many **networking opportunities** and **collaborative talks/workshops** with other ICSM societies and MedTech societies in London to broaden outreach
- Have talks from speakers from a **variety of different background** (e.g. not just healthcare workers but engineers, computer scientists, biologists etc. that have entered the field)
