## My Goals:

- As treasurer, I will keep an updated track of internal finances and ensure to optimise our budget by working together with the executive committee according to our goals as a society and our members' needs.
- Bring more attention to WIB by demonstrating the ability of our society in connecting students with key players in the field.
- My goal would be to secure several sponsorship-deals for our society. I will send emails out and make phone calls, but I will also contact sponsors directly at events in Imperial, such as career fairs.
- Once a sponsorship is acquired, I will ensure I maintain a strong relationship with sponsors by ensuring we regularly invite them to events we organize and keeping them up to date with the society achievements and progress.
- To help deliver opportunities to our fellow women by ensuring financial stability.

## Why Me?

- As a second-year biochemistry student and life scientist, I aspire to become a consultant within investment or life sciences.
- I enjoy learning about economics and the world around me through listening to podcasts such as the Wall Street Journal, Financial Times and The Economist.
- When I'm not listening to these, I am often reading; my favourite book is *All About Love* by Bell Hooks (also my favourite author currently - best known for her writings on race, feminism, and class).
- I have secured a UROP for my first term of second year studying bacterial effector proteins at the Thurston Laboratories, therefore I am comfortable reaching out to professionals.
- I am proficient with Excel and its various applications (organisation and statistical analysis) and would love to apply my analytical skills to organize our team and society as well as aid in solving problems.
- I have experience maintaining strong rapports through running my own private tutoring business for over 2 years and working in sales.
- I enjoy networking and meeting industry professionals, students with similar interests and forming meaningful relationships with peers. I would be excited to work within our team to grow our society!
