A Supportive, Strong, and Stable community

Who am I?

I'm Siqi (you can call me Siki!). I'm from Singapore and I love working with people!

What are my goals?

I aim to build an unforgettable CivEng experience for everyone through Support, Strength and Stability!

Support

I aim to:
- Create a safe space for you to share
- Consistently communicate our needs with the department
- Ensure that your feedback is used for improvement.

Strength

I hope to organise bonding activities such as:
- Department games
- Group meals

Stability

We can build a sense of stability through:
- the Support from myself and the department
- the Strength from our friendships

After all, what's a building without its community?
