Who am I?

I am Gabriel Tan, a 1st Year Chemistry Student! I am running to be President of Imperial College Singapore Society as I have felt the **warmth** that the SingSoc **family** has given me. I would like to continue this strong tradition.

What will I do?

- I aim to work well with the ExCo to ensure that the quality of events organised continue to be **fun and exciting**
- I will ensure that we as a Committee regularly collect and reflect on the **feedback and the suggestions** from our community
- I will include seniors and freshmen alike to participate in community-wide events to foster a sense of **kinship and belonging**

Why me?

I have been part of several committees, and more crucially, I have failed and learnt from the mistakes I made in the past.

Moreover, I am friendly and approachable; I want to help SingSoc continue to be a family which helps our fellow Singaporeans feel at home, just as it did for me.

Additionally, I am responsible and committed to lead the society to greater heights in future. If you would like to know more about me and what kind of President I would like to be, drop me a message and I'll get back to you! If you think that I am the best candidate for this role, do vote for me in the upcoming elections!
